Question #3

How can Estrella Mountain improve the Dual Enrollment Partnership with your High School?

Expand course offerings to other areas such as Physics. Community college certification requirements prevents high school instructors from teaching certain classes that they have been teaching for 20 years. This can be due to missing credit on transcript. Vocational gives credit for years in field; perhaps the same could apply or even provide temporary certification.

Offer science classes - Chemistry, Physics, Anatomy. Expansion of vocational offerings. 2+2+2 partnership.

Don't know at this point.

Very pleased with partnership with EMCC. High school needs to recruit more teachers for the program..

Improve billing procedures. Most of the students got bills and that was not suppose to happen.

Would like to see expansion of course offered. Need to get teachers. Science chair had made a commitment to supply some equipment but did not follow through on commitment.

Very impressed with EMCC campus. Far exceeded expectations and is a great program. College president talked with us. When students and I visit, Clay Goodman, Dr. Yohe and all the instructors are friendly and talk with students.

Trevor Browne has a partnership with Phoenix College, maybe EMCC, PC and Trevor Browne could meet together & talk about what each offers to benefit everyone.

Have 80 students and was unable to get transportation to EMCC to have ID's made for students. Use to have the ID"s done at Metro Tech. The students really feel they are college students when they have the ID's. They also go to Phoenix College because of location & if they don't have ID then it is difficult to use the facilities.

Disappointed that do not have physics.

Very pleased with partnership with EMCC. Disappointed with the limitations on dual enrollment due to state mandate. First year or two will be an adjustment for juniors with new mandate because they expect enrollment guidelines to be the same as it has been in the past.
